

The American Lebanese Medical Association and the Middle Eastern Pharmacy Association are seeking donations of medications, medical supplies, surgical instruments, and PPE to be distributed to Catholic hospitals and clinics in Beirut, Lebanon.

On August 4, 2020, after the explosion at the port of Beirut rendered 300,000 people homeless, and countless injured, the hospitals were overwhelmed with victims and their medical supplies have been severely depleted. Surgeons have resorted to renting surgical instruments in order to perform operations, and the majority of the population have been facing a shortage of their medications. We are asking for donations of medications and medical supplies in order to support them in this time of dire need.

Our long term goal is to continue to supply much needed medications, supplies, and PPE to various hospitals and/or NGOs working directly with the Lebanese people..

If Providence is willing to donate any medications or supplies, we would be extremely grateful. For further details, please contact alma.socal@gmail.com

We appreciate any and all help in this desperate time of need.

Sincerely,

American Lebanese Medical Association Middle Eastern Pharmacy Association
